

# Daylight lamp

Daylight lamp gives a very strong and diffuse light (almost no shadows) which is very close to actual daylight, i.e. it is now possible in the spray booth/oven or in the preparation area to determine whether the applied colour matches. The Lamp is situated on a very stable trolley with wheels.

The lamp is height adjustable and can be rotated as desired as the angle can be adjusted also. At the rear of the lamp are two socket outlets for regular 230 V. 5 m. rubber cable. A tool you don't want to do without.

## The lamp

2 x 36 Watt work light, 2 socket outlets for tools or lamps on rear of cabinet, energy-saving fluorescent tubes, easy change of tubes, no risk of fire or injury, the lamps never get hot. Casing of impact resistant plastic with oil resistant rubber frame. Simple mounting on trolley, rotates 360 degrees, tilts and is height adjustable. Many different applications.

Dimensions: 50 x 29 x 12 cm.  
plus adaptor.

## The trolley

Very stable, made from 40 x 40, 30 x 30 and 25 x 25 mm. precision steel, powder coated, 4 strong turn able 50 mm. double wheels, upright pipe and turning point electro galvanised. Trolley dimensions: 42 x 50 x 21 cm - height 110 cm.
